DETAILED ACTION

Allowable Subject Matter

1. Claims 11, 12, 14-16, 18-20 and 27 allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 6-10 and 26 rejected under 35 U.S.C. 102(e) as being anticipated by Bertin et al. (6,982,903).

Regarding Claim 6, Bertin et al. disclose field effect devices having a source controlled via a nanotube switching element where in Fig. 2B, it is disclosed an integrated circuit 300, a device to be monitored/controlled T1, a carbon nanotube field effect transistor FET 50/T4 approximate to said device to be controlled/monitored wherein CNT FET 50 is capable of detecting defective transistors T1 and T2 within integrated circuit 300 wherein the transistor T1 to be controlled/monitored comprises a gate, a source region, a drain region and a gate insulator separating the gate from the source and drain regions. Examiner considers claim 6 to have functional language. Therefore, looking at Fig. 2 of the current application, and Fig. 2B of prior art, examiner considers the Fig. 2B of prior art being capable of functioning as the Fig. 2 of current application.

Art Unit: 2826

Regarding Claim 7, CNT FET 50/T4 comprises a gate, source and drain

Regarding Claim 8, transistors T1 and 50/T4 comprise a shared structure.

Regarding Claim 9, transistor T1 with source/drain regions and the transistor 50/T4 with source/drain regions comprise a shared structure.

Regarding Claims 10 and 26, T1 is a field effect transistor.
